Key Management

Why key management?

Improved efficiency

Our system will save you time and money, allowing you to track and locate any key in seconds.

Increased control

Our system uses a unique peg system which allows only authorised staff to access keys.

Secure

Enjoy peace of mind by housing the Keymanager board in a cabinet.

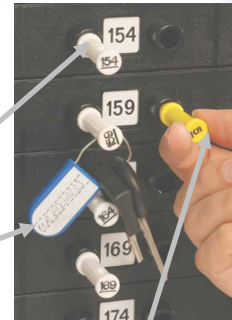

Flexibility

The key management solution is tailorable to your needs and comes in a variety of different sizes.

How does it work?

Key retention peg with unique combination: number and colour.

Anti-tamper seal to securely bind the key to the retention peg.

User access peg allowing easy visual identification based upon colour scheme.

Keys are released when an authorised user inserts and locks their personalised access peg into the key manager board. Only when the key is returned the personalised access peg is returned.

Simple, understandable, manageable!

No more searching for keys. Put an end to the frustration of looking around for that one key. The system will change the way keys are being handled.

All it takes is a quick look at the board to notice empty key retention spots. The personalized user access peg identifies the user holding the key.

All of our cabinets are self-closing, use a combination lock for daytime use and have two five-lever locks for right time security.

From one to hundreds of keys, a large number of users, multiple functional areas, different access profiles... let us share the best practices.

Wide range of industries

Our reliable and easy-to-operate key management solutions are supplied to a wide range of industries.

- ◊ **Automotive**
Used by car dealerships controlling from 25 to hundreds of keys.
- ◊ **Police**
Used to control large quantities of vehicle keys and equipment.
- ◊ **Healthcare**
Used by hospitals and care homes to manage keys, medical equipment and medicine
- ◊ **Industrial manufacturing**
Used to lock down high risk machinery.
- ◊ **Property and Construction**
Used to manage property keys and machinery.
- ◊ **Airports**
Used to control ground crew vehicle keys.
- ◊ **Hospitality**
Used by hotels to manage out of hours check-ins.
- ◊ **Recreation parks**
Enabling control of the access to technical and public rooms.

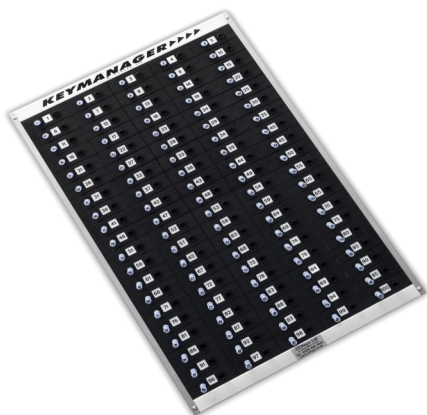

We understand the frustration and cost implications involved in inappropriate key management. That is why we offer high quality, reliable and easy to use key storage systems which add value to a wide range of industries.
