Product Catalog

Dear customer,

For S-inc, organisational puzzles have always been an important focus: planning, visualisation of (heaps of) information, management in a fast changing world, new ways of working, etc.

Fifteen years, that is how long S-inc has proven added-value in a wide range of business segments. From manufacturing to healthcare, from logistics to finance: our advice combined with our product offering and individual solutions, have always been positively received by our customers. Your loyalty is the best proof!

S-inc is a small company. That is a conscious choice: fast time-to-market, as lean as possible. And not to forget, S-inc is not acting alone:

- ◊ For Belgium, Luxembourg and the north of France: we are the official partner for Weigang, Ultradex and CCKeys, three highly reliable manufacturers.
- ◊ We co-operate with - what we call - an "inner circle" network: a group of trusted consultants, each of them having the same mindset concerning quality delivery. On a regular basis we meet, exchange ideas...

This product catalog presents our actual standard product offering. However, do not hesitate to contact us for all your ideas: we might surprise you with our creativity and agility in solution engineering. Requirements do change and the catalog will on a regular basis reflect those changes.

Kind regards,

Wouter Debroey.

## VisuBoard

Just a small design variation on the basic board: but still a magnetic write-on and dry-erase board. Upon request, we print your logo on the board, so that it blends in perfectly into your Corporate Identity.

With its silver-coloured surface, its anodized aluminium frame and its diagonally cut corners, this visualisation board fits into any modern office.

*Part 4 guides you through all visualisation potential!*

## Double-sided Board

The characteristics of the Basic Board, but available on two sides.

Free-standing frame with aluminium frame in white (RAL 9002), red (RAL 3003), blue (RAL5002) or anodized. Colour of corner profiles like Basic Board.

√ Fixed on the frame or rotatable(\*).

Here as well, your specific needs are our priority: dimension? Colour? Print? ... Please provide us with your input.

## PinMag

Is one of the multifunction talents among the visualisation boards. Its surface is made of anthracite-coloured felt and covered with a metal stretch grid, so that you can attach your notices with pins or magnets as desired.

The stylish frame of anodized aluminium provides your documents with a noble environment.

Magnetic and pin accessories are described in [Part 5](#).

## Grid Board

A ferromagnetic board with printed grids (10 mm x 10 mm) - 50 mm spacing. Grids can be applied by means of corner prints (cf. picture) or as full grid prints, depending on the model.

Incl. installation kit for wall mounting, with aluminium frame in white (RAL 9002), red (RAL 3003), blue (RAL 5002) or anodized.

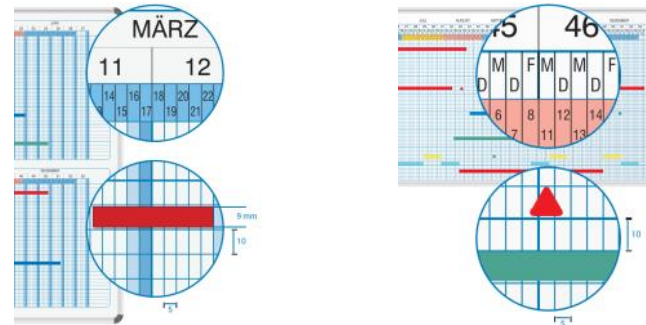

A variation: most of the grid boards are also available as sliding panels on a rail system.

*Horizontal, vertical, flush: The discrete grids help you to attach your information precisely.*

- ◇ Which document size(s) will be used?
- ◇ How many columns?
- ◇ How many rows are needed?
- ◇ Room for a legend?

## Stagger Display IV

Grey white RAL 9002 stagger plates are placed overlapping in the blue RAL 5002 frame.

The frame and stagger plates are made of metal. The stagger plates can easily be adjusted and can be re-aligned in 20 mm steps. As such visible edges from 20 mm to 100 mm in any desired combination can be set up.

The capacity of the stagger display IV is 6 to 29 mm, depending on the defined visible edge and document size.

The underneath table lists a number of possible and often requested settings. Each of them provides a visible edge of 80 mm and a capacity of 21 mm.

## Channel Planner V - Kanban

The planning system channel planner V is equipped with flexible, self-clipping channel rows to hold KANBAN cards.

A stable frame comprises the board. The modular concept of the scheduling board always provides the possibility for later expansion.

The accessories of the planning board channel planner V ensure quickly intelligible and clearly arranged information:

- √ Limiting Strips: reduce and limit the row length to a width defined by the user.
- √ Yellow and red markers: used for the coloured definition of the KANBAN status areas "Start" and "Urgent".

*Let us help you to analyse and define the applicable KANBAN rules and to select the KANBAN solution type.*

## T-Card Board

With this flexible board the card holders can be changed arbitrarily: individual holders can be taken out and the others slip accordingly. Cards can as well - without any effort - be pushed in between.

Ideal for:  
Planning in numerical or alphabetical order, tour and appointment planning and employee assignments.

- √ 2 Widths: 84 mm and 114 mm.
- √ 3 Heights: 510 mm, 740 mm and 980 mm.

Not included: T-cards, wall track or magnetic mount. Please contact us to have the right accessories & equipment selected.

## PLANO Sliding Planning

The all-purpose planning board, adequate for every planning task.

The overlapping channel rows are designed to insert cardboard strips. The self-clipping function of the individual rows prevents accidental movement of the cardboard strips.

The universal capability of the planning system PLANO is displayed by the signals which can be placed on the channels. They stand out behind the data strips and enable an additional possibility of visualisation.

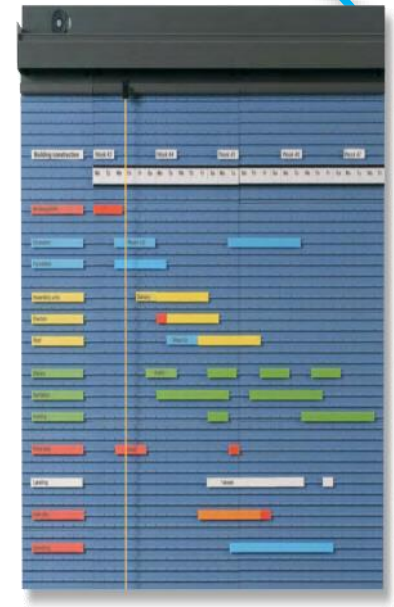

## DYNA Sliding Planning

Consists of profile rails, on which write-on plastic bars are clipped.

This snap-on mechanism allows easy restructuring or rescheduling. A lot of information can be identified already from a distance because of the coloured signal bars.

The Sliding Planning system can be extended endlessly on the side.

*Do not hesitate to contact us for advice. Together we will tune your all-round planning system:*
